Chlorine, bad taste, pesticides, herbicides, insecticides, etc.

Whole House Filtration Advantages

Chemical free water throughout your entire home

Bathrooms

Chlorine and chemical free showering, bathing and washing

Filtered water will avoid side effects from chlorinated water, such as dry skin, premature skin aging and dry hair. Studies show toxic chlorine by-products, pesticides and other chemicals in tap water can be inhaled and absorbed through the skin while bathing or showering and linked to health risks like cancer, miscarriages and damage to the DNA and respiratory tract

Kitchen

Contaminant free drinking, cooking and better tasting water

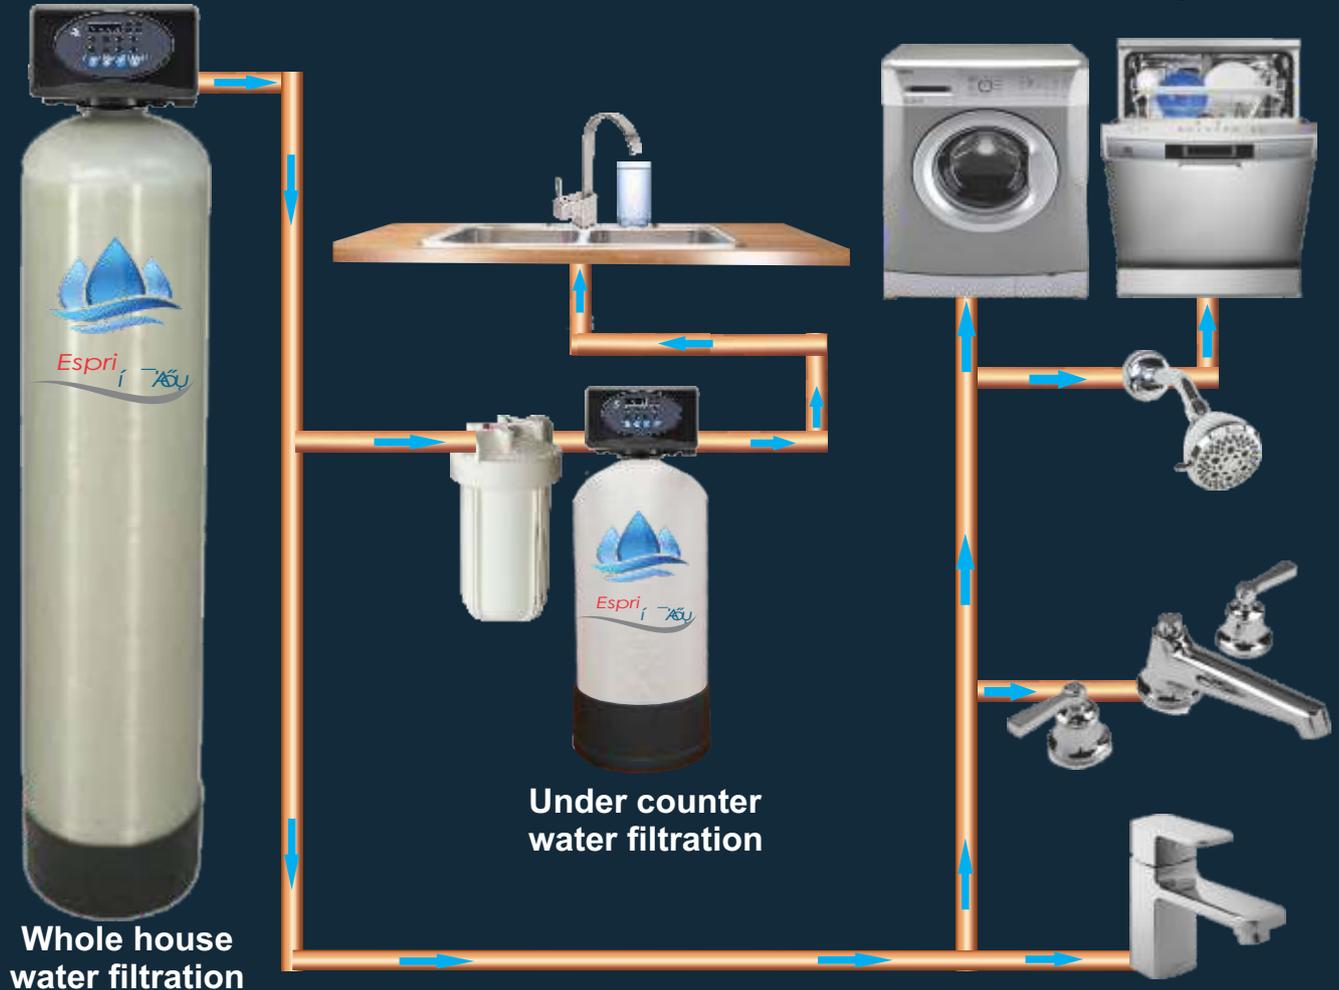

Studies suggests that prenatal exposure to disinfection by-products increases the risk of low birth rate, ventricular septal defects, cleft palate, some can cause birth defects, some are genotoxic, which damage DNA, leukemia and some we know are also carcinogenic bladder, large intestine, and rectum cancer and asthma, thyroid gland tumors and liver tumors, bladder cancer, carcinogenic in the liver, kidney and/or intestine, food allergies

Whole House Water Filtration

The best investment you can make for your home AND the health of your family

Ideal whole house water filtration setup

- ✓ Low maintenance cost
- ✓ Easy to install
- ✓ Chemical free water from every water source in the house
- ✓ Clean drinking, cooking and washing water
